

Global Solutions Lab: Baseline Metrics

Snapshot taken Tuesday, 6 October 2026. Goal for the rest of 2026: grow GSL from 422 users to 1,000 by 31 December. Run the same measures again in December and fill in the shaded columns.

Key takeaways

- **The goal needs a step change, not a steady push.** GSL added 217 users in the last 12 months, about 4 a week. Reaching 1,000 means about 47 a week, roughly 11 times the current pace. Only class-sized or event-sized intakes (dozens of users at once) can close that gap.
- **Growth already comes from classes.** The best months were January 2026 (45 new users, 49 new solutions) and May 2026 (34 / 31). There were no new signups in September and 3 so far in October.
- **Most users are not active.** Only 24 users were active in the last 30 days, and 70 in the last 90. Signing people up is not enough; they need a reason to come back.
- **Most solutions are solo and empty.** 305 of 367 solutions (83%) have one person on them, and 226 (62%) have nothing saved in any step. Only 62 solutions have a real team (2 or more people).
- **Very little is being worked on right now.** 9 solutions were edited in the last 30 days and 39 in the last 90. Only 3 team solutions were edited in the last 30 days.
- **Teams finish more often.** Team solutions are 17% of all solutions but 56% of submitted ones (15 of 27).

1. Users

Metric	6 Oct 2026	31 Dec 2026	Notes
Registered users	425		Goal metric (target 1,000)
Users on at least 1 solution	275 (65%)		Shown as "Active users" on the dashboard
Users with no solution	150 (35%)		Signed up, never joined a solution
Active, last 7 days	10		Last sign-in or last activity
Active, last 30 days	24		
Active, last 90 days	70		
New users, last 30 days	3		By date joined
New users, last 90 days	32		
New users, last 12 months	217		About 4 per week
Email: subscribed / unsubscribed	412 / 13		Reachable audience for outreach

Monthly milestones to 1,000

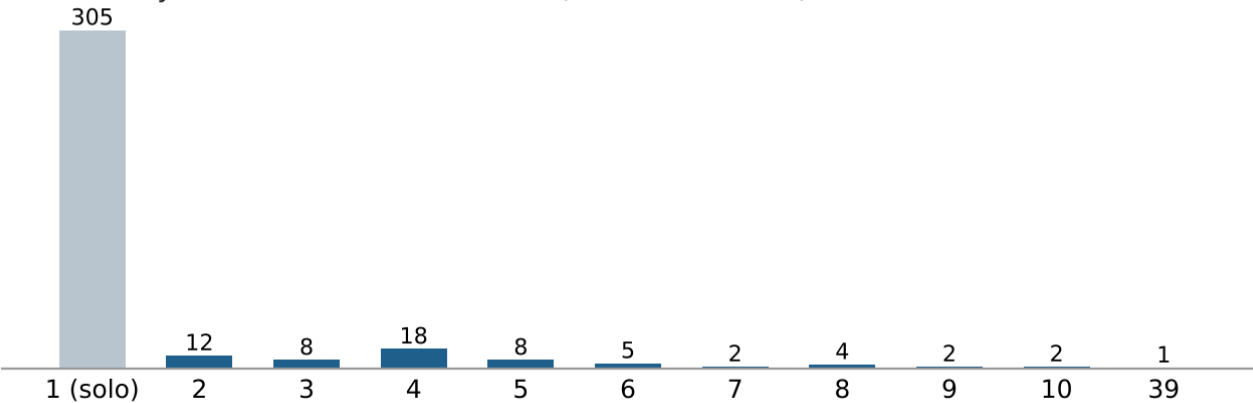

A straight line from 425 today to 1,000 on 31 December (about 6.7 new users a day).

Checkpoint	Target registered users	Actual	On track?
6 Oct 2026 (baseline)	425	425	-
31 Oct 2026	592		
30 Nov 2026	793		
31 Dec 2026	1,000		

2. Teams

Team size = number of distinct participant emails on a solution (the owner counts as one).

Solutions by number of team members (all 367 solutions)

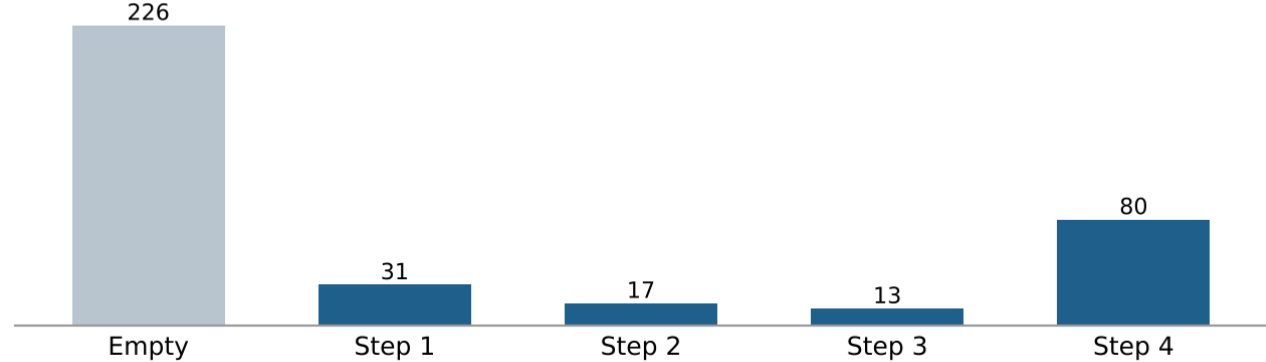

Team size	All solutions	With saved content	Submitted	Edited last 90 days	31 Dec 2026
1 (solo)	305	84	12	19	
2 people	12	11	3	2	
3 people	8	7	2	4	
4 people	18	17	6	9	
5+ people	24	22	4	5	
Total	367	141	27	39	

Team metric	6 Oct 2026	31 Dec 2026
Solutions with a team (2+ people)	62 (17%)	
Largest team	39 people ("Adapting to a Changing World: Building Resilient Communities")	
Next largest teams	10, 10, 9, 9 people	
Team size, median / average (teams of 2+)	4 / 5.1	
Average people per solution (all)	1.68	
Users on any solution	275	
Invited by email, no account yet	32	
Users on 2+ solutions	116	
Most solutions held by one person	27	
Team solutions with saved content	57	
Team solutions edited in last 30 days	3	

3. Solutions: what is really being worked on

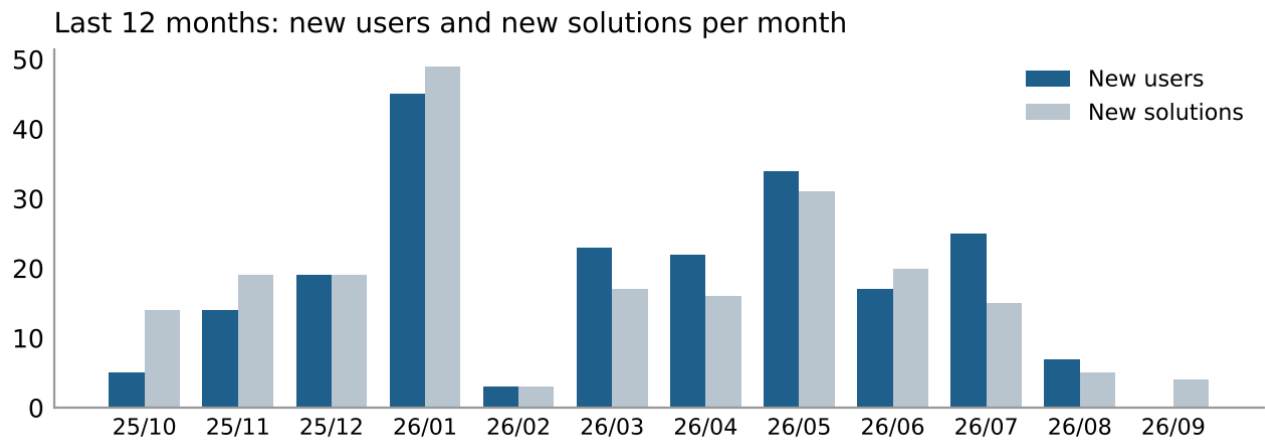

A step counts once a solution has any saved content in it; the furthest step is the highest step with saved content (same rule as the Solution Step Tracker on the page).

Solutions by furthest step with saved content

Metric	6 Oct 2026	31 Dec 2026	Notes
Total solutions	367		
Empty (no saved step content)	226 (62%)		Started but never worked on
Has saved content	141 (38%)		
Furthest step: 1 / 2 / 3 / 4	31 / 17 / 13 / 80		80 reached Step 4 (Implementation)
Submitted (finished)	27 (7%)		Dashboard completion rate
Submitted in last 90 days	2		By submission date
Edited in last 7 days	1		Last tracked edit
Edited in last 14 days	4		
Edited in last 30 days	9		Recommended "actively worked on" metric
Edited in last 90 days	39		25 of these are at Step 4
No tracked edit timestamp	238		Older solutions; recency counts are a floor
Evaluated at least once	16		
Entered in a tournament	3		Target for the Drexel class outreach
Private solutions	4		

4. Trend

Peaks line up with classes and workshops (Jan 2026, May 2026). The last two months are the quietest of the year, so the baseline is low going into the push.

5. Goal scorecard for 31 December 2026

Measure	Baseline 6 Oct	Target 31 Dec	Actual 31 Dec
Registered users	425	1,000	
Active users, last 30 days	24		
New users since 6 Oct	0		
Solutions edited in last 30 days	9		
Team solutions (2+) edited in last 30 days	3		
Solutions with saved content	141		
Submitted solutions	27		
Tournament entries	3		
Drexel class solutions submitted to tournament	-		
Professors contacted / using GSL in class	- / -		

Definitions and method

Source. Live Firestore data loaded by the admin page localhost:4200/user-management on 6 Oct 2026 (all user documents and all solutions). Numbers were computed in the browser with the page's own helpers, so the December re-run will be comparable.

Registered user. An account with an email, as counted in "Total users" on the dashboard.

Active user. Most recent of: Firebase Auth last sign-in, or lastActiveAt on the profile, within the window.

Team size. Distinct participant emails on the solution.

Edited. The page's solution activity timestamp (last substantive / step / draft edit). 238 older solutions have no timestamp, so recency counts are a minimum.

Caveat. 6 submitted solutions show no saved step content; these are legacy records stored in an older format.

To re-run in December: open /user-management while signed in as admin and run the same script in the browser console, or ask Claude to repeat this snapshot.
